

Ring Size Guide

Before any measurement please check that your ring size guide is printed in A4 international paper and scaled to 100%. Please place a credit card on the line below to ensure that your ring size guide is printed on the correct dimensions. If your card fits accurately on this shape you are ready to go!

Suggestion No1

Please cut the shape below as well as the line on the right side, in order to create a slot for your measuring tape. Wrap it around your finger and pull gently the edge through the slot. Tighten the measuring tape until the point that a ring would go on and off your finger easily. See your ring size pointed by the arrow on the tape.

Suggestion No2

Use a ring you already have and has a comfortable fit. Place it on the circles below, based on the inside of your ring, in order to see only gold colored area. If your size is between two circles choose the larger size or please contact us for suggestion.
